#### 2. HAZARDS IDENTIFICATION

Information in this section only concerns the product as supplied. Contact your account manager to get more information on diluted form hazards identification.

Product Classification : FLAMMABLE LIQUIDS - Category 2

EYE IRRITATION - Category 2B

Signal word : Danger Hazard pictograms

regulated. The product is regulated under the food

Hazard statements : Highly flammable liquid and vapors.

Causes eye irritation.

Precautionary statements

General : Highly flammable liquid and vapors. Handle with care. Read label before use.

Prevention : Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and

other ignition sources. No smoking. Wash thoroughly after handling.

Response : IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. IF IN EYES: Rinse cautiously with water for

several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or

attention.

Storage : Not applicable.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements : No additional information.

Other hazards which do not result in : None known.

classification

# 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/mixture : Mixture

Name Name	CAS number	% (w/w)
Ethanol	64-17-5	60 - 80
sopropyl alcohol	67-63-0	1 - 5

Occupational exposure limits, if available, are listed in Section 8.

# 4. FIRST AID MEASURES

#### Description of required first aid measures

Eye contact In case of contact with eyes, flush with fresh water. Check for and remove any contact lenses. Continue rinsing. If irritation persists, get

medical attention.

Skin contact In case of irritation, rinse with water. Get medical attention if irritation persist.

Ingestion Rinse mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Inhalation Move victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if adverse health effects persist or

are severe. Maintain an open airway.

#### Most important symptoms/effects, acute and delayed

Adverse symptoms may include the following: Eve contact

irritation watering redness

Skin contact No specific symptoms under normal use conditions.

Ingestion No specific symptoms under normal use conditions. Inhalation No specific symptoms under normal use conditions.

Notes to physician Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

See toxicological information (Section 11)

# 5. FIRE-FIGHTING MEASURES

# Extinguishing media

chemical

Suitable extinguishing media Use dry chemical, CO2, water spray (fog) or foam.

Unsuitable extinguishing media Do not use water jet.

Specific hazards arising from the

Highly flammable liquid and vapors. In a fire or if heated, a pressure increase will occur and the container may burst,

with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.

Hazardous thermal decomposition products Decomposition products may include the following materials:

carbon dioxide carbon monoxide

Special fire-fighting procedures

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action should be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use

water spray to keep fire-exposed containers cool.

Special protective equipment for firefighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a

full face-piece operated in positive pressure mode

# 6. ACCIDENTAL RELEASE MEASURES

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and Personal precautions

unprotected personnel from entering. Do not touch or walk through spilled material. Initiate spill response procedures if required.

Personal protection Put on appropriate personal protective equipment (see Section 8).

Cleaning method Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculity or diatomaceous earth and place

in container for disposal according to local regulations (see Section 13). Use a water rinse for final clean-up.

#### 7. HANDLING AND STORAGE

**Handling** Use in a way to prevent food contamination. Follow label instructions for ue.

Storage and Incompatibility

Store in accordance with local regulations. Store in a segregated and approved area. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Keep out of reach of children. Store away from incompatible materials (see Section 10).

Appropriate engineering controls

For manufacturing or industrial uses it can be appropriate to: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilating equipment.

Individual protection measures

**Eye/face protection** Continued or intense exposures might required to wear safety glasses.

Hands and Body protection No specific protective equipment required under normal use conditions.

No special protective clothing is required.

**Respiratory protection** No specific protective equipment required under normal use conditions.

# 10. STABILITY AND REACTIVITY

Reactivity No specific test data related to reactivity available for this product or its ingredients.

Chemical stability The product is stable.

**Incompatible materials** Reactive or incompatible with the following materials:

oxidizing material

Conditions to avoid Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat

or sources of ignition.

Hazardous decomposition products Under normal conditions of storage and use, hazardous decomposition products should not be produced.

# 11. TOXICOLOGICAL INFORMATION

Route of exposure Not available.

Potential acute health effects Symptoms

Eye contact May cause eye irritation. Adverse symptoms may include the following:

irritation watering redness

Skin contact No known significant effects or critical hazards. No specific symptoms under normal use conditions.

Ingestion No known significant effects or critical hazards. No specific symptoms under normal use conditions.

Inhalation No known significant effects or critical hazards. No specific symptoms under normal use conditions.
